

GEOLOGY APPLIED TO THE PHARMACY (GEOPHARMACY): Biocrystallography and Mineral Raw Materials

MODULE	CONTENT	YEAR	TERM	CREDITS	TYPE			
Pharmacy	Geopharmacy	2º, 3º, 4º	1º	6	Optional			
LECTURER(S)			POSTAL ADDRESS, TELEPHON N°, E-MAIL					
<ul style="list-style-type: none"> • Rafael Delgado Calvo Flores • Jesús Párraga Martínez • Gabriel Delgado Calvo-Flores • Juan Manuel Martín García 			Department of Pedology and Agricultural Chemistry First floor, School of Pharmacy Office 183, 184, 185 y 186. E-mail: rdelgado@ugr.es , jparraga@ugr.es , gdelgado@ugr.es , jmmartingarcia@ugr.es					
			TUTORSHIPS HOURS					
			R. Delgado: Tuesday, Thursday, and Friday from 9,30 to 11.30 (F. Pharmacy) J. Parraga: Tuesday and Thursday from 11,30 to 13,30; Wednesday from 12.30 to 14.30 (F. Pharmacy) G. Delgado: Monday, Wednesday and Friday from 10.30 to 12.30 (F. Pharmacy) J. M. Martin: Monday, Tuesday and Thursday from 9,30 to 11,30 (F. Pharmacy)					
DEGREE WITHIN WHICH THE SUBJECT IS TAUGHT			OTHER DEGREES THAT COULD TEACH THE SUBJECT					
Pharmacy			Environmental Sciences, Chemical Sciences, Biochemistry, Medicine and Life Sciences					
PREREQUISITES and/or RECOMENDATIONS (if applicable)								
Appropriate knowledge of Mathematics, Physics, Chemistry, Physical Chemistry. Some basic knowledge of the Natural Environment.								
BRIEF DESCRIPTION OF CONTENT (ACCORDING TO THE DEGREE)								
Biocrystallography. Principles of crystallography Applied to the Pharmacy: polymorphism. Excipients, active ingredients and toxic minerals: raw materials for application in Pharmacy, Cosmetics and other Health Sciences. Human Biominerals (bones, teeth, calculus).								
GENERAL AND SPECIFIC ABILITIES								

General abilities: CG1, CG4, CG12 y CG15.
Specific abilities: CEM1.1, CEM1.2, CEM1.3, CEM1.5, CEM1.9, CEM1.10, CEM1.11, CEM3.1, CEM4.2, CEM4.5, CEM5.14, CEM5.15, CEM6.1, CEM6.4, CEM6.6, CEM6.7.

OBJECTIVES (EXPRESSED AS EXPECTED RESULTS OF THE TEACHING)

- 1 Biocrystallography: Crystallography of biological macromolecules. Crystallization: methods for studying.
- 2.-Polymorphism: influence of the crystal structure and the physical, chemical and physico-chemical properties in the bioavailability of substances (crystalline/minerals) used in pharmaceutical formulations.
- 3 Mineral raw materials of interest in Pharmacy and Cosmetics: active ingredients, excipients and toxic. Pharmacopoeia standards for use.
4. Human Biominerals: not pathological (bones, teeth, etc) and pathological (calculus)

TOPICS OF THE SUBJECT

THEORETICAL PROGRAM

PART 1.- Concept. Fundamentals of Biocrystallography.

Theme 1.- Concept of the subject

Theme 2.- Fundamentals of Biocrystallography

PART 2.- Crystallization, properties, and methods of study specific for crystalline solids

Theme 3. - Basic principles of crystallization

Theme 4.- Pharmaceutical and cosmetic properties of crystalline solids

Theme 5.- Pharmaceutical polymorphism

Theme 6.- Specific methods of study for crystalline solids

PART 3.- Crystallography of biological macromolecules

Theme 7.- History of the Crystallography of Biological Macromolecules

Theme 8.- Crystallization of macromolecules

Theme 9 .- Structure of macromolecular crystals

PART 4. Mineral raw materials for pharmaceutical and cosmetic use. Toxic minerals.

Theme 10.- Mineral classification applied to Pharmacy and Cosmetics. Species not silicate of interest in Pharmacy and

Theme 11.- Silicates of interest in Pharmacy and Cosmetics I

Theme 12.- Silicates of interest in Pharmacy and Cosmetics II: Fillosilicates

Theme 13.- Carninogenic fiber in Pharmacy. Other toxic minerals

PART 5.- Aptitude in Pharmacy of mineral materials

Theme 14.- Minerals as active principles

Theme 15.- Minerals as excipients. Cosmetic uses

PART 6.- Human biominerals. Relations of minerals with life. Minerals, environment and human health

Theme 16.- Main human phosphate biominerals

Theme 17.- Other human biominerals

Theme 18.- Mineral origin of life

Theme 19.- Minerals, environment and human health (Geomedicine)

PRACTICAL PROGRAM

Practice 1

Controlled formation of crystals. Crystallization of substances with inorganic nature. Crystallisation techniques for substances for pharmaceutical use (polymorphism). Formation of macromolecular crystals of protein. Precipitation of pharmaceutical cocrystals. Recrystallization of active pharmaceutical ingredients.

Practice 2

Formation of “Crystal Gardens”: an experiment about the mineral origin of life.

Practice 3

Assays of Pharmacopoeia for minerals of pharmaceutical and cosmetic uses.

Practice 4

Recognition and quantification of mineral species and other crystalline substances of pharmaceutic and cosmetic uses using X-ray diffraction techniques. Internal structure of crystalline material. Study of the crystal lattice and symmetry.

Practice 5

Recognition and analysis of mineral species and other crystalline substances of pharmaceutic and cosmetic uses using scanning electronic microscopy techniques.

PROGRAM OF SEMINARS. ORAL EXPOSITION OF PAPERS

Seminar 1

Search for knowledge: books, journals, reports; computer search. Processing of the information. Drafting of a bibliographic paper.

Seminar 2

Oral exposition of paper. Scientific criticism and debate.

BIBLIOGRAPHY

BASIC BIBLIOGRAPHY:

Fundamentals of Crystallography

Authors: C. Giacovazzo, H.L. Monaco, D. Viterbo: F. Scordari G.Gilli. G.Zanotti. M. Catti.

Year of publication: 2002

Editorial: Oxford Science Publications

Crystal Growth. Principles and Progress

Authors: A. W. Vere
Year of publication: 1998
Editorial: Plenum Press

Métodos de Difracción de Rayos-X. Principios y Aplicaciones

Authors: Joaquín Bermúdez Polonio
Year of publication: 1981
Editorial: Pirámide

Manual de Mineralogía de Dana

Authors: Comelius. S. Hulbert Jr. : Cornelis Klein
Year of publication: 2003
Editorial: Reverte, S.A.

Mineralogy for Students

Authors: M. H. Battley
Year of publication: 1997
Editorial: Longman Scientific & Technical

Minéralogie des Argiles. 1, Structure et Propriétés Physico-chimiques

Authors: S. Caillière S. Hénin M. Rautureau
Year of publication: 1997
Editorial: INRA Actualités Scientifiques et Agronomiques

Modern Crystallography. I. Symmetry of Crystals, Methods of Structural Crystallography

Authors: B.K. Vainshtein
Year of publication: 1994
Editorial: Springer Verlag.

Modern Crystallography II. Structure of Crystals

Authors: S.K. Vainshtein: V.M. Fridkin: V.L. Indenbomm
Year of publication: 2000
Editorial: Springer Verlag.

An introduction to the rock forming minerals

Authors: W.A. Deer, R.A. Howie, J. Zussman
Year of publication: 1992
Editorial: Longman Scientific & Technical

Mineralogía Aplicada. Salud y Medio Ambiente

Authors: M.I. Carretero, M. Pozo
Año de publicación: 2007
Editorial: Thomson

Geomedicine

Authors: Låg J
Year of publication: 1990
Editorial: CRC Press, USA.

Medical Mineralogy and Geochemistry.

Authors: Nita S, Schoonen MAA (Eds.)
Year of publication: 2006
Editorial: Reviews in Mineralogy and Geochemistry Volume 64. Geochemical Society and Mineralogical Society, USA

Essentials of Medical Geology

Authors: Sellinus O, Alloway B, Centeno JA, Finkelman RB, Fuge R, Lindh U, Smedley P
Year of publication: 2007
Editorial: Elsevier Academic Press.

Medical Geology : Effects of Geological Environments on Human Health

Authors: Komatina MM
Year of publication: 2004
Editorial: Developments in Earth and Environmental Sciences, 2. Elsevier

TEACHING METHODOLOGY

Theoretical academic sessions, this teaching technique is based on the lectures. Approximate duration of one hour; in it the teacher will explain the theoretical foundations of the subject. It will stimulate the active participation of the student.

Practical academic sessions. They will be in the laboratory of crystallography, mineralogy and radiocrystallography. The number of students is 25 and the teacher will direct the work of each individual. The day-to-day of each student will be valued even if at the end a test, oral and written, will be made to estimate the degree of learning of these practical sessions.

Seminars, oral exposition of papers and debate.

In these sessions will discuss and clarify issues related to the theoretical sessions. Also, some of these sessions will be used for the oral presentation of the students of academic activities directed by the teacher. These sessions will be accompanied by a debate.

PROGRAMME OF ACTIVITIES

First semester	The- mes	Class activities					Self-study				
		Teoretic al sessions (hours)	Practical sessions (hours)	Seminars and oral exposition of papers (hours)	Exams (hours)	Etc.	Individual tutoring (hours)	Colective tutoring (hours)	Individual study of students (hours)	Teamwor k (hours)	Etc.
Week 1	1, 2	2		1					4		
Week 2	3	2	1						4		
Week 3	4	2	1	1					4		
Week 4	5	1,5	1	1	0,5				5		
Week 5	6	1	1	2					4		
Week 6	7, 8	2	1	1					4		
Week 7	9, 10	3	1						4		
Week 8	11	2	1	1	0,5				5		
Week 9	12	1	1	2					4	2	
Week 10	13	2	1	1					4	2	
Week 11	14	1	1	2					4	2	
Week 12	15	1	1	2	0,5				5	2	

Week 13	16	2	1	1					4	2	
Week 14	17	2	1	1					4	2	
Week 15	18	2.5	1		0,5				5	2	
Week 16	19	1		2	2				5	3	
Total	19	28	14	18	4				69	17	

EVALUATION (EVALUATION INSTRUMENTS, EVALUATION CRITERIA AND PERCENTAGE ON THE FINAL QUALIFICATION, ETC.)

- 1.- Exam written about the contents of the program. It may be test type, questions of application of theoretical concepts or problems.
- 2.- Exam of practices and seminars: oral and written. Seek to be scrutiny which apply the theoretical and practical knowledge through problem solving.
- 3.- Realization and presentation of a collective paper on specific aspects of the subject.
- 4.- Assistance to academic activities organised and accepted by the Faculty of Pharmacy or the University of Granada, related with the subject.

The approved practices and seminars is *sine qua non* for the overcoming of the subject

To overcome any exams of the subject, it is necessary to get a score higher than the average between the null value and the highest possible rating. Scores below average, but close to it, such will be evaluated taking into account all the work done during the course.

The theoretical-practical sessions and seminars are mandatory. Assistance to the theoretical activities will be assessed positively.

Exposure of the collective paper will be assessed based on the level of knowledge, clarity in the exposition and defence of the knowledge exposed.

The assistance to other academic activities, whose theme is related to the subject, will be valued if the student presents a summary of the exposed in such activity and officially justified its assistance.
